The book is about meanings and descriptions of vocabularies in the context of urban design. The content illustrates some sketches together with the definitions that relate to types of urban space. These are simple sketches and terminologies that are commonly encountered by practitioner, educator and students in the disciplines of landscape architecture, urban planning and architecture. In the built environment professions, understanding the meanings of certain urban forms and elements is quite crucial. Therefore, the characteristics of spaces of certain urban setting can be best comprehended through good visual information and simple explanations.
